| End of Life notification for Qlarity software – 2 July 2018 |
| Enhancement requests* accepted until 31 October 2018 |
| Bug reports* accepted until 31 December 2018 |
| End of Support (EOS) for all Qlarity software – 31 December 2022 |

Qlarity is the runtime firmware and programming software for many of the Beijer Electronics QTERM-based HMIs. These products include but are not limited to QTERM-G55, QTERM-G56, QTERM-G58, QTERM-Z60, QTERM-G70, QTERM-G72, QTERM-G75, and some of the QTERM-A7 and QTERM-A12 models and a number of custom models.

All of these hardware product lines have end-of-life notifications. This notice is associated with the firmware and software associated with these QTERM units.

The direction of Beijer Electronics is to its iX line of products, away from Qlarity and other non-iX products.

Qlarity-based products have been part of Beijer Electronics' product portfolio for more than 20 years. Beijer will provide technical support through EOS date, will no longer consider software updates, enhancements, or bug fixes.

* Beijer will consider these requests and reports and will make decisions on each whether to address or not to address.

Thank you for your attention to this End of Life notification. Please contact your Regional Sales Manager or Inside Sales Representative if you have any questions or need assistance with this EOL notice and product replacement options.
