

End of Life (EOL) will be issued 5 May 2011 for the products listed below.

Revision 1 of the TREQ-M4 is being discontinued. It is being replaced or upgraded to revision 2.

The TREQ-M4 revision 2 is the same as the TREQ-M4 revision 1 in almost every respect. It is the same form factor, uses the Windows CE 6.0 R3 Core or Professional operating system, and the same CPU. The changes that are important to note are as follows:

- The standard memory has been increased to 256 Mbytes of SDRAM and 4 Gbytes of NAND flash
- A third USB port and an Ethernet port are now always present in the integral cable
- Most importantly, the new integral cable of 1.6 meters length is terminated with a DB26f HD connector

For more information on the TREQ-M4, see <http://beijerinc.com/product/vehicle/treq-m4-m4x.php>.

Thank you for your attention to this End of Life notification. If you have any questions or concerns, please do not hesitate to contact your Beijer Electronics representative.

Sincerely,
Product Management
